President Elect 2020 – 2022

President 2022 – 2024

Past President 2024 -2026

As a social psychologist I have followed how the significance of the concepts of European identity and citizenship have changed over these years. When I joined CiCe there was an apparent enthusiasm and a general belief in the well-functioning, cooperative European Union and a clear support within the countries being in and out of the EU of the European idea. The so called post-socialist countries, including mine considered a major step forward to be part of the European Union. This enthusiasm has changed dramatically by now and I myself working for more than two decades in these networks and association and also in research for the idea of a well-functioning Europe, in which competition is coupled with high level of cooperation among the countries, face that the significance of making young people aware of their responsibility, encouraging their active engagement and participation in shaping the future of Europe in the most constructive way is imperative. As a president of CiCeA I am going to work in all of my capacities and also utilizing my social and professional capital to promote this goal. I would like to rely on the members (colleagues and also many of them friends) cooperation to work for a new generation of European citizens who value their nation and its interconnectedness and intertwined existence with other European nations and the world.

AGA - AGENDA
